

▶ Polycom® KIRK® Wireless Server 600v3

IP Telephony for a wide range of businesses

The KIRK Wireless Server 600v3 is a scalable solution capable of registering up to 1500 wireless users making it an excellent choice for small and medium-sized businesses across a wide range of vertical markets.

Cost-Effective Business Wireless

Using an IP interface to the PBX, power over Ethernet and IP routing between base stations, the KIRK Wireless Server 600v3 is a cost-effective system that allows for re-use of existing network infrastructure and components.

The KIRK Wireless Server 600v3 can be deployed as either a single-cell or a multi-cell solution and can be adjusted to fit the exact size and needs of the individual customer. A single-cell version, consisting of one KIRK Wireless Server 600v3 and up to 6 KIRK Repeaters, can support up to 35 users. When there is a need for more than 35 users at a location, additional KIRK Wireless Server 600v3s can be installed in a multi-cell configuration. Up to 256 radio units (a mix of KIRK Wireless Server 600v3s and KIRK Repeaters) can be used to provide the necessary radio coverage.

A multi-site solution can be further customized to include number of single-cell and multi-cell deployments depending on the size of each individual location.

A KIRK Wireless Server 600v3 is installed directly on the LAN and must be managed as part of the corporate network.

About Polycom

Polycom, Inc. (NASDAQ: PLCM) is the global leader in telepresence, video, and voice solutions and a visionary in communications that empower people to connect and collaborate everywhere.

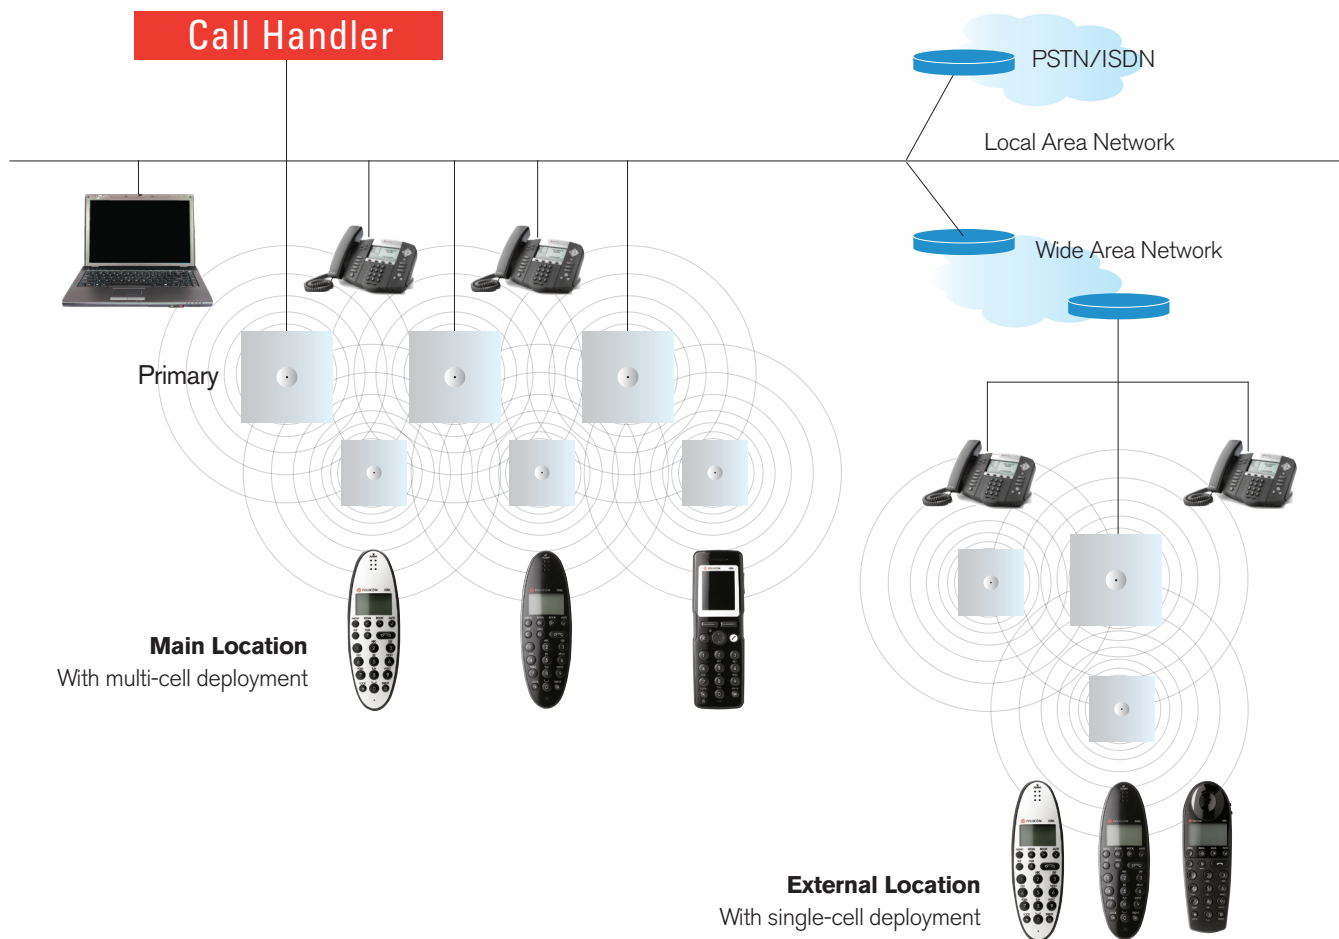

Companies choose Polycom solutions because they allow geographically dispersed workforces to communicate more effectively and productively over distances. Using Polycom voice, video, and telepresence products and services, people connect and collaborate with one another from their desktops, meeting rooms, class rooms, and mobile settings rather than travelling to one place to solve problems.

Find out how your workers can quickly collaborate "face-to-face" wherever they are. Visit www.polycom.com.

Benefits

- ▶ Improve responsiveness and productivity of mobile workers dramatically
- ▶ Deliver high-quality and secure voice communications across all enterprise environments
- ▶ Leverage investment in circuit-switched and IP PBX features throughout the workplace
- ▶ Increase business efficiency by integrating with application systems and business processes
- ▶ Maximize employee availability using simple, reliable and durable devices

Polycom® KIRK® Wireless Server 600v3 Configuration

Leverage IP Benefits with a KIRK Wireless Solution

Above is an illustration of how the KIRK Wireless Server 600v3 could be implemented in a business with two company locations, with the locations being connected via a wide area network. An IP-based call handler is placed at the main location.

The main location is shown with multi-cell deployment and is equipped with a primary KIRK Wireless Server 600v3, a number of secondary KIRK Wireless Server 600v3 and a number of KIRK Repeaters. The other location is shown with single-cell

deployment and has a KIRK Wireless Server 600v3 and a number of KIRK Repeaters.

This VoIP solution eliminates redundant infrastructure, simplifies administration and maintenance, reduces costs as well as improves employee mobility and remote connectivity.

For information on supported PBX platforms, see interoperability list on www.polycom.com

Features

- 1.9 GHz operation minimizing interference with other wireless technologies
- Excellent voice quality and security
- Modular design for simple installation and scalability
- Up to 35 Wireless Users (single-cell)
- Up to 1500 Wireless Users (multi-cell)
- IP interface based on H.323 or SIP protocol
- Digium Certified - Asterisk SIP Business Edition
- Power over Ethernet
- Browser Configuration Option
- Text messaging application support
- Provisioning of configuration, firmware and wireless users
