

McAfee Internet Security for Mac

Comprehensive Internet Security to freely explore the web

We all know that Macs don't get PC viruses, but the Internet is a dangerous place and Macs are just as vulnerable to Internet threats as PCs. Phishing websites can steal your personal information and malicious websites can download malware that you might unknowingly spread to your friends. With the daily emergence of new and more sophisticated Internet threats that could disrupt your digital life, you need more than the Mac OS to protect yourself, your computer, your identity and your family.

McAfee® Internet Security for the Mac automatically helps protect your Mac from malware; cyber attacks, and safeguards your personal information from data-stealing programs and would-be hackers. It gives you the freedom to explore, download, and shop on the Internet any time, any place without fear of criminals or cyber attacks. McAfee is the number one provider of Internet security and is relentlessly committed to protecting and empowering you on the Web.

Features and Benefits

Website Ratings

McAfee® SiteAdvisor® software adds safety ratings to your browser and search engine results providing analysis on each website. It annotates each search result with red, yellow, or green ratings, letting you know if a website is safe or warns you of potential security flaws.

Safe Search

The safe search feature in McAfee SiteAdvisor software blocks sites with red annotations so users can't click on bad links.

Blocks Phishing Sites

Recognizes phishing websites and blocks them by delivering real-time protection.

Anti-spyware

Protects against harmful programs that monitor, collect, and send personal information to cyber criminals.

Email and IM Scanning

Scans and cleans attached files received from Apple Mail and iChat programs so you can exchange files freely.

Anti-malware

Protects against viruses, Trojans, worms, bots, and root-kits.

File Repair

Repairs and removes infections from files without damaging format or contents.

Firewall Protection

Restricts access to and from specific applications communicating via Internet or local area networks.

- McAfee SiteAdvisor is currently supported by Firefox browser only

The McAfee Advantage

- McAfee is the world's largest dedicated security company.
- 30-day free phone support and unlimited email and chat assistance.
- Continuous and automatic updates for the life of your subscription.

The image shows a browser window with several search results. Three McAfee SiteAdvisor pop-ups are overlaid on the browser, each pointing to a specific search result. The first pop-up (yellow) points to 'otGalore.com' and indicates a 'potential suspicious behavior' with safety test results: 'Linked to red sites', '50 pop-ups', and '2 red downloads'. The second pop-up (red) points to 'Bank.com' and indicates 'potential security risks' with the same safety test results. The third pop-up (green) points to 'Music Downloader.com' and states 'We tested this site and didn't find any significant problems' with the same safety test results. Each pop-up also includes a 'Read Site Report' link and an 'Upgrade to SiteAdvisor Plus' button.
