

Sophos Anti-Virus Small Business Edition (SBE) 4

Sophos Anti-Virus SBE 4 lets you simply secure your business with an easy-to-use solution for Windows and Macs. It protects with anti-virus and encryption technologies and also controls applications to reduce the risk of both data loss and malware infection.

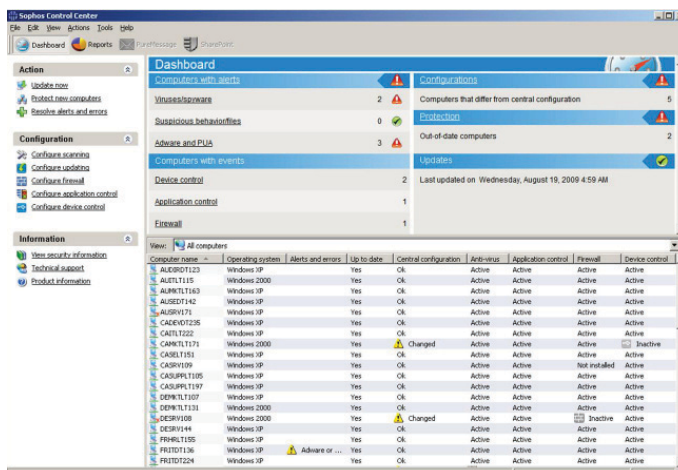

Installs fast and is easy to use

Streamlined installation enables non-technical users to deploy protection across the network in minutes. The Sophos Control Center summarizes threats at a glance, and simplifies key tasks with its easy-to-read dashboard, providing an instant overview of the status of every computer in your portfolio. Furthermore, the Sophos AutoUpdate feature ensures that all computers, including remote laptops, are protected at all times.

Multi-threat protection in one product

Our integrated anti-virus, Sophos Endpoint Security and Control for Windows, eliminates the need for multiple products. One quick scan detects, cleans up and protects against threats on Windows servers, desktops and laptops. With Sophos Endpoint Security and Control for Windows you can:

- Control known and unknown malware, including spyware, rootkits, suspicious files and web script attacks
- Defend against potentially unwanted applications such as adware, dialers, remote administration tools and hacking tools considered unsuitable for most business networks
- Block or allow controlled applications, such as VoIP, IM, and P2P depending on productivity or security concerns
- Identify suspicious code and blocks it before execution using integrated Behavioral Genotype Protection® without having to deploy separate software
- Delete or disinfect malware, potentially unwanted applications, suspicious files and controlled applications with the easy-to-use, integrated quarantine manager

Sophos Control Center simplifies administration for anti-virus and application control

Key benefits

- » Allows non-technical users to protect their Windows and Mac quickly and easily
- » Simplifies installation, management and configuration of anti-virus and anti-spyware with Sophos Control Center
- » Detects and removes viruses, spyware, adware and potentially unwanted applications (PUAs) centrally
- » Controls applications like P2P file sharing
- » Encrypts information and allows secure data exchange with SafeGuard® Encryption technology
- » Blocks new and targeted threats before they cause damage, with Behavioral Genotype Protection®
- » Updates automatically with the latest protection, direct from Sophos
- » Ensures users are kept productive with fast, low impact scanning engine
- » Includes 24x7 technical support by Sophos experts for the duration of the license
- » Provides unlimited access to telephone, online and email based support

Protects data with application control and encryption

- Protect confidential company data and personal information on mobile devices and in email with Sophos SafeGuard PrivateCrypto encryption technology
- Control the risk of data loss by blocking the use of applications like P2P file sharing, instant messaging and remote access applications

Detects and cleans up malware hidden on Macs

- Delete and clean all malware including Windows viruses on both Intel and Power-PC based Macs via integrated cross-platform virus detection
- Automatically check for malicious code using a range of technologies, including Dynamic Code Analysis™, pattern matching, emulation and heuristics
- Use patented Behavioral Genotype Protection to analyze Windows and other non-Mac files deliver enhanced protection against unknown threats

Industry-leading security expertise 24x7

- Get unlimited expert help when you need it, with 24-hour telephone, email and online technical support
- SophosLabs™ provides a rapid response to emerging and evolving threats
- Get protection from a recognized market leader in endpoint anti-virus, anti-spam and data protection and automatic updates and product upgrades are also included in your license cost

Sophos small business solutions — choose the right one for your business

All small business editions install fast, protect Windows and Mac computers and include automatic updates with 24x7 technical support coming as standard. Use the table below to choose the right level of protection for your business.
