

Trend Micro™

AntiVirus + AntiSpyware

 Now optimized
for Windows 7!

Essential Defense against Viruses and Spyware

Trend Micro AntiVirus + AntiSpyware is the essential security you need so you can email and share files with confidence. You can rest easy knowing you have ongoing, easy-to-use protection against the latest malicious viruses, worms, Trojan horse programs, and spyware.

KEY FEATURES

Protects against current and future viruses

An award-winning anti-virus engine protects against computer viruses, worms, Trojan horse programs, and related security threats. Automatic updates immunize you against new computer virus outbreaks for the full duration of your subscription.

Defends your personal information with anti-spyware technology

Powerful anti-spyware technology guards your personal information and privacy against spyware, rootkits, and other malicious software.

Provides real-time protection with automated computer scans

On-demand, scheduled and real-time scanning options actively protect your computer from viruses or spyware in files, incoming and outgoing mail, webmail, and instant messages.

Prevents unauthorized changes

Improved security policies find and stop unwanted attempts to change your operating system and critical software.

Quarantines suspicious files

Trend Micro AntiVirus + AntiSpyware isolates potential or uncleanable threats in a quarantine folder rather than deleting them immediately, allowing you to recover specific files and programs.

Cleans browser history, cookies, and unnecessary files

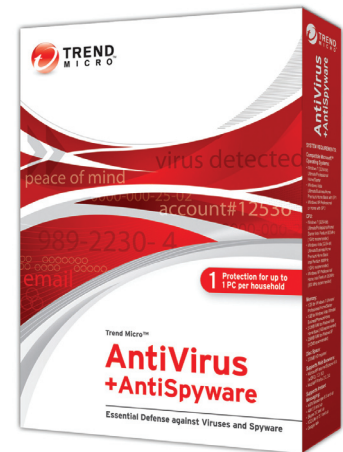

Protect your privacy by removing records listing recently opened websites, and allows you to manage web browser cookies and temporary files deposited on your computer from websites.

Provides customizable security warnings

Decide how often you want to receive warnings about security threats.

Includes free product support

Get FREE phone, email, and online chat support with your annual subscription

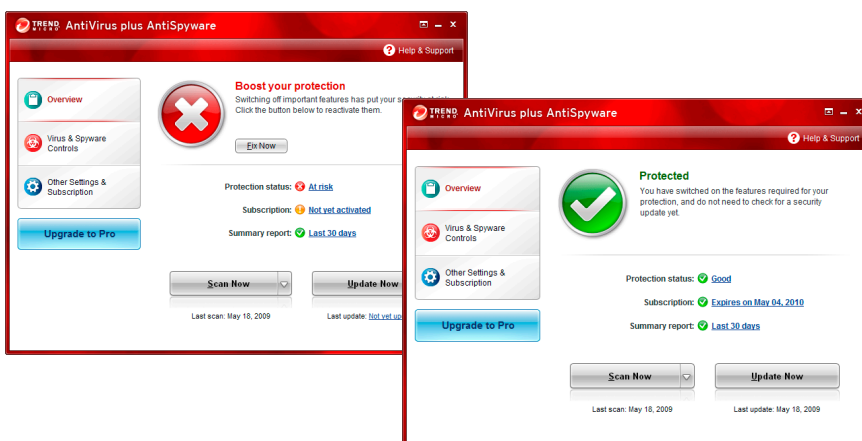

SOFTWARE
